

Afrid Shaik

Software Engineer — AI/ML & Backend Development

(203) 606-3012 | afridshaik2002@gmail.com | linkedin.com/in/afridshaik | github.com/afrid06-ai

PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in **AI/ML systems**, **Generative AI**, and **cloud-native backend development**. Experienced in building **RAG pipelines**, integrating **LLMs**, and deploying scalable **REST APIs** and **microservices** with **Docker/Kubernetes**. Skilled in **CI/CD**, **cloud deployment**, and **automation**. Strong foundation in **Agile/Scrum**, **OOP**, and **DSA**.

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, C/C++, JavaScript, SQL

Frameworks: FastAPI, Spring Boot, Django, Node.js, LangChain

Databases/Cloud: MySQL, PostgreSQL, MongoDB, Firebase, Redis, AWS, GCP

DevOps: Docker, Kubernetes, Git, GitHub Actions, GitLab CI/CD, Linux

AI/ML: LLMs/Transformers, Generative AI, RAG, NLP, Computer Vision, FAISS, Pinecone, TensorFlow, scikit-learn, Pandas, NumPy

PROFESSIONAL EXPERIENCE

Rubix

Remote

Data Scientist / ML Engineer

Jul 2023 – Jul 2024

- Built and deployed a **Generative AI platform** with **LangChain** and **vector search (FAISS, Pinecone)**, enabling secure, source-cited enterprise Q&A.
- Designed an end-to-end **RAG pipeline**, improving **semantic search**, reducing query latency by **35%**, and boosting accuracy.
- Automated reporting workflows with **multi-agent orchestration**, cutting manual effort by **40%**.
- Containerized and deployed **microservices** with **Docker & FastAPI**, integrated into **cloud-native** infrastructure ensuring **99.9% uptime**.

Tekion

Chennai, India

SDET Intern

Jan 2023 – Jul 2023

- Developed scalable **automation frameworks (Selenium + TestNG)**, reducing regression testing effort by **50%**.
- Integrated automated test suites into **GitLab CI/CD pipelines**, reducing release cycles by **40%**.
- Designed **API-level test automation** for **microservices**, increasing defect detection rate by **30%**.
- Conducted **load/performance testing**, improving scalability and reliability of auto-retail platforms.

PROJECTS

Research Paper Answer Bot (RAG System)

- Built a **Retrieval-Augmented Generation** pipeline using **LangChain + FAISS** to enable domain-specific Q&A from Generative AI/LLM research papers.
- Implemented **semantic search**, indexing, and conversational Q&A with **source citation** for transparency.

Neurometric Cognitive Games (SwiftUI + Firebase)

- Developed a **SwiftUI mobile app** with Reaction Time, Visual Memory, and Sequence Memory tests; added **multi-player mode**.
- Integrated **Firebase Auth/Firestore** for user authentication, score tracking, leaderboards, and **Swift Charts** for analytics.

Study Assistant (AI-Powered Learning App)

- Designed an **AI-driven study app** with flashcards, quizzes, and gamified progress tracking; implemented bottom navigation (Home/Upload/Search/Quizzes/Profile).
- Backed by **Firebase** for user authentication, cloud storage, and synchronized learning progress.

EDUCATION

University of New Haven

Master's in Computer Science

United States

2024 – Expected May 2026

SRM Institute of Science and Technology

B.Tech in Computer Science (Software Engineering), CGPA: 8.83/10

India

2019 – 2023
